

Discharge circular duct connection

Discharge rectangular duct connection

Range of single inlet direct drive centrifugal fans manufactured by injection moulding. Antistatic polypropylene housing. Motor support and anticorrosive gaskets material providing protection against possible gas leakage. High-performance antistatic polypropylene impeller with forward curved blades.
Working temperature from -10ºC to +50ºC.

Motors
All motors are IP55, class F insulation.
Available in 2, 4 or 6 poles.
Electrical supply:
Three phase 230/400V-50Hz.
(See characteristics chart).

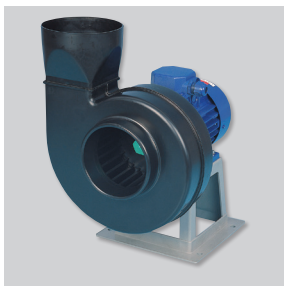

ATEX
ATEX versions available for 3-phase models.
For ambient working temperature -10ºC to +40ºC.
Motor IP55, Class F.
- ATEX Flameproof - Gas
  - II 2G Exd IIB T4
  - II 2G Exd IIB+H2 T4 (with motor Exd IIC T4)

To select CMPT ATEX refer to performance data, or Easyvent.
Note electrical data may vary for ATEX motor

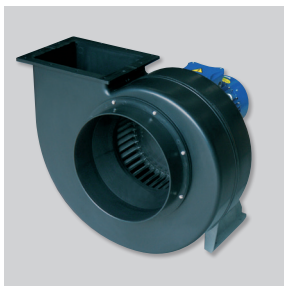

Additional information
The mounting frames are manufactured from:
Nylon (models from 14 to 25).
Polypropylene (models 30 and 35).
Galvanised sheet steel (model 42).
Standard supplied position: LG 0.
The scroll can be oriented in 8 different positions. Screws in stainless steel.

Specific applications

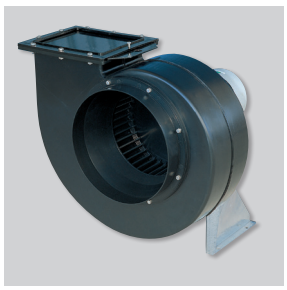

Corrosive atmospheres

Discharge circular duct connection
For models CMPT-14, CMPT-20 and CMPT-25.

Discharge rectangular duct connection
For models CMPT-30, CMPT-35, CMPT-42 and CMPT-20A
* On request, CMPT-14, CMPT- 20 and CMPT-25 are also available with discharge rectangular duct connection.

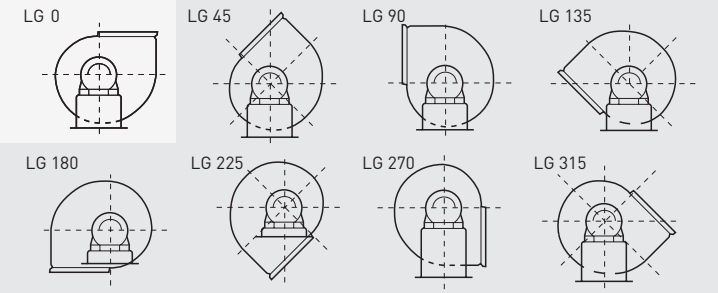

Tough and quality design
Antistatic polypropylene housing. Screws in stainless steel.

Forward curved centrifugal impeller
High-performance antistatic polypropylene impeller with forward curved blades.

POSITIONS

LG 0 standard supplied position. Other LG positions configuration manufactured on request.

TECHNICAL CHARACTERISTICS

Before installation check that the product electrical characteristics listed on the data plate label (voltage, power, frequency, etc.) match those of the intended electrical supply.

Model	Speed (rpm)	Motor size (mm)	Motor power (kW)	Maximum absorbed current (A)		Maximum airflow (m^3/h)	Sound pressure level* (dB(A))	Weight (kg)
				230 V	400 V

* Sound pressure dB(A), measured in free field conditions at a distance of 1,5 meters.

ACOUSTIC CHARACTERISTICS

Sound power at the inlet and outlet at three points of the curve: low pressure (B), medium pressure (M) and high pressure (H).
